

SRAVAN SUNKETA

Senior Data Analyst | Product Analytics | User Behavior Analytics | SQL | Python

[City, State] • [Phone] • [Email] • [LinkedIn URL]

PROFESSIONAL SUMMARY

Senior Data Analyst with **5+ years of experience** leveraging **SQL, Python, statistical analysis, and business intelligence** to drive decision-making across large-scale consumer and e-commerce platforms. Proven record of delivering measurable impact — **+12% watch time** through recommendation analytics at Meta, **+18% forecast accuracy** and **\$2M+ in prevented lost sales** at Amazon, and **60–70% reporting automation** across both. Expert in **Product Analytics, A/B Testing, Forecasting, and Executive Dashboarding**, partnering with cross-functional stakeholders to turn complex data into actions that improve engagement, revenue, and operational efficiency.

TECHNICAL SKILLS

Core Analytics: SQL, Advanced SQL, Python (Pandas, NumPy), Product Analytics, User Behavior Analytics, Recommendation Analytics, Engagement Analytics

Experimentation & Statistics: A/B Testing, Experiment Design, Statistical Analysis, Hypothesis Testing, Experimentation Analytics, Causal Analysis, Metric Development, Performance Measurement

Product & Growth Analytics: Retention Analysis, Funnel Analysis, Cohort Analysis, Growth Analytics, KPI Development, Customer Analytics, Business Analytics, Predictive Analytics

Data Visualization & BI: Tableau, Power BI, Dashboard Development, KPI Dashboards, Data Visualization, Business Intelligence, Executive Reporting, Automated Reporting

Data Modeling & Engineering: Data Modeling, ETL, Data Pipelines, Data Warehousing, Feature Engineering, Query Optimization, Data Quality Management

Recommendation & Engagement Systems: Recommendation Systems Analytics, Ranking Performance Analysis, Content Discovery Analytics, Watch-Time Analytics, Content Consumption Analytics, Creator Analytics

Forecasting & Operations Analytics: Demand Forecasting, Inventory Analytics, Supply Chain Analytics, Inventory Optimization, Forecast Performance Analysis, Operations Analytics

Business Leadership: Stakeholder Management, Cross-Functional Collaboration, Data-Driven Decision Making, Root Cause Analysis, Strategic Decision Support, Executive Communication, Problem Solving

PROFESSIONAL EXPERIENCE

Data Analyst | Meta, USA

Aug 2023 – Present

- Analyzed **2B+ daily Reels impressions**, views, watch-time events, likes, shares, and comments across Facebook and Instagram using **SQL** and **Python**, identifying engagement drivers that informed ranking improvements lifting **average watch time by 12%**.
- Developed scalable **SQL and Python (Pandas, NumPy)** analytical frameworks to measure **recommendation quality**, content relevance, and retention, cutting analysis turnaround by **40%** and enabling adoption across **5+ product teams**.
- Built automated **executive dashboards (Tableau)** tracking watch time, completion rate, engagement rate, retention, and recommendation health metrics, eliminating **15+ hours/week** of manual reporting and accelerating product decisions by **30%**.
- Partnered with Product Managers, Data Scientists, and ML Engineers to evaluate **ranking model performance**, quantifying a projected **+8% engagement lift** from recommendation algorithm enhancements prior to large-scale rollouts.
- Designed and analyzed **25+ large-scale A/B experiments** per quarter using **hypothesis testing and causal analysis**, identifying high-performing ranking strategies that drove a **6% increase in watch time** while protecting retention metrics.
- Conducted **deep-dive cohort analysis** of watch-time behavior and content consumption journeys across **10+ user segments**, uncovering opportunities that improved **content discovery click-through rate by 9%**.
- Built **cohort and retention analysis frameworks** to evaluate AI-recommended content impact, surfacing insights that contributed to a **5% improvement in D30 retention** for recommendation-driven surfaces.
- Engineered reusable **data models and ETL datasets** integrating behavior signals, content metadata, and engagement attributes, reducing query runtimes by **35%** and standardizing metrics for **20+ analysts**.
- Developed **funnel analytics** measuring impression-to-view conversion, watch-time progression, and completion behavior, pinpointing friction points that reduced **funnel drop-off by 11%** across recommendation surfaces.
- Performed **root-cause analysis** on engagement fluctuations and content distribution anomalies, cutting mean time-to-resolution by **45%** and strengthening platform performance monitoring.

- Automated experimentation reporting, **KPI scorecards**, and analytical workflows in **Python and SQL**, reducing manual reporting effort by **60%** and reclaiming **12+ hours/week** for higher-value analysis.
- Delivered **strategic recommendations** on recommendation effectiveness and retention drivers that directly shaped **3 roadmap initiatives**, contributing to a **7% overall engagement improvement** across Reels and Feed experiences.

Data Analyst | Amazon, India

Apr 2020 – Jun 2022

- Analyzed **50M+ sales, inventory, and fulfillment records** using **SQL** and **Python** to identify demand patterns and category-level trends, driving insights that improved category planning accuracy by **10%**.
- Developed **demand forecasting models** leveraging historical sales, seasonality, and promotional signals, improving **forecast accuracy by 18%** and enabling more effective inventory planning across high-volume segments.
- Built automated **forecasting dashboards and KPI scorecards** in Amazon BI tools, delivering real-time visibility into forecast performance and inventory health while saving **20+ hours/month** of manual reporting.
- Supported **Prime Day and peak-season planning** with demand projections and readiness reports, helping teams absorb a **30%+ demand surge** while maintaining a **99%+ in-stock rate** on priority SKUs.
- Partnered with Supply Chain, Operations, and Category Management to optimize **inventory allocation strategies**, contributing to a **6% improvement in product availability** during high-demand periods.
- Performed **root-cause analysis** on forecast variances, stockout events, and inventory imbalances, enabling corrective actions that reduced **stockout incidents by 22%**.
- Designed **SQL-based analytical frameworks** flagging **5,000+ high-risk SKUs** and demand anomalies, helping stakeholders prioritize replenishment and prevent an estimated **\$2M+ in lost sales**.
- Automated recurring forecasting and business reporting in **Python**, reducing manual effort by **70%** and cutting reporting turnaround from days to hours for operational teams.
- Engineered **forecasting features** including seasonality indicators, rolling demand trends, and promotional impact variables, strengthening model performance by **12%**.
- Collaborated with cross-functional stakeholders across Fulfillment, Operations, and Business teams, translating findings into recommendations that shortened **planning cycles by 25%**.
- Delivered data-driven insights that improved **inventory utilization by 15%** and reduced stockout risk by **20%**, enhancing fulfillment and supply chain decision-making.
- Presented forecasting performance and demand trends to leadership, informing **\$10M+ in inventory investment decisions** and strategic planning outcomes.

SELECTED PROJECTS

Reels Recommendation & User Engagement Analytics

- Developed analytical frameworks to evaluate **recommendation quality, engagement, and retention** across large-scale recommendation-driven platforms, supporting a **7% overall engagement improvement**.
- Analyzed **billions of user interactions** — impressions, watch-time events, likes, shares, comments — identifying consumption patterns that improved **content discovery CTR by 9%**.
- Built **cohort, funnel, retention, and A/B testing frameworks** powering **25+ experiments per quarter** and a **12% lift in average watch time** from ranking strategy optimization.

Technologies: SQL, Python, Product Analytics, A/B Testing, Cohort Analysis, Funnel Analysis, Retention Analytics, Dashboard Development

Demand Forecasting & Inventory Optimization Analytics

- Developed **forecasting and inventory analytics** solutions using historical sales, seasonality, and promotional signals, improving **forecast accuracy by 18%** and planning effectiveness.
- Analyzed **50M+ records** to flag demand anomalies and **5,000+ high-risk SKUs**, preventing an estimated **\$2M+ in lost sales** and reducing **stockouts by 22%**.
- Built **forecasting dashboards, KPI scorecards, and anomaly detection frameworks**, improving inventory utilization by **15%** and saving **20+ hours/month** in manual reporting.

Technologies: SQL, Python, Demand Forecasting, Inventory Analytics, Supply Chain Analytics, Business Intelligence, Dashboard Development

EDUCATION

M.S., Computer & Information Science

Dec 2024

Concordia University Wisconsin | CGPA: 3.75
